

## UGent - Sint-Pietersnieuwstraat

Next to the existing rectory and the Vooruit building, the Gent University is planning a new construction of some 12,000 m<sup>2</sup>, which will provide space for a number of offices, labs, administration, meeting facilities and student-linked services.

Next to the existing rectory and the Vooruit building, the Gent University is planning a new construction of some 12,000 m<sup>2</sup>, which will provide space for a number of offices, labs, administration, meeting facilities and student-linked services.

Also two auditoria, seating respectively 600 and 400 persons, will be provided. These two auditoria will be partitioned by a 30-ton upward-moving wall that will allow using both rooms as a common auditorium in raised position. A 50-m illuminated news trailer at the building front allows sharing messages with the city. Besides these very technical components, Ingenium also designed all technical systems (HVAC, electrical circuitry, sanitary facilities, car park ventilation and elevators).

For design of the HVAC installations, considerable attention was paid to rational energy consumption through natural ventilation and night-time venting. The auditoria will be provided with adiabatic cooling.

## Developer

Universiteit Gent, Directie Gebouwen en Facilitair Beheer

## **Designer / Architect**

Stéphane Beel - Xaveer De Geyter

Location

Ghent

## **Budget technics**

approx. 3.600.000 EUR (excl. VAT)

Surface

approx. 12.000 m<sup>2</sup>

Periode Study:

2003-2009

Sectors

Education

Services

Building services engineering
