

Campus Malle-Zoersel, owned by the Emmaüs group, contains a General Hospital and numerous building from the psychiatric centre. A new data centre of 65 m² was built to house the IT-infrastructure of both campus Malle and campus Duffel.

Provided techniques are emergency power aggregate, UPS, redundant climatization, gas extinguishment and technical alarm management. The data centre has also the possibility to accommodate bladeservers in a cold corridor and has an updated telephone infrastructure with 1500 connections.
