

MIROM Extension of district heating network in Roeselare "Ronde kom"

Ingenium designs, by order of Mirom, the extension of the heat grid in the centre of Roeselare. Ingenium will take care of the entire process: from initial customer contact and customer contract, from technical design to guidance and realisation, from permits to support in applying for subsidies. The total project budget is estimated at EUR 4 million.

With a large-scale expansion of the heat network, heat producer and heat network manager MIROM wants to significantly increase its heat activities in Roeselare. Ingenium will design, by order of MIROM, the extension of the heat network in the centre of Roeselare. Ingenium takes care of the entire process: from first customer contact and customer contract, from technical design to guidance and realization, from permits to support in applying for subsidies. Ingenium takes care of an autonomous project elaboration, whereby MIROM is relieved to a maximum extent. The total project budget is estimated at EUR 4 million.
