

Energy audit Sciensano - site Wytsman

Sciensano, the Belgian Institute of Health, has appointed Ingenium to carry out an energy audit of the Wytsman site.

The audit was carried out according to the provisions of the Brussels Institute for Environmental Management.

- Collection of all data and info, analysis and description of the main energy characteristics of the building
- Thermographic measurement campaign of the furnace room
- Measurement of temperatures (room, return, circuits, outside temperature) on the boiler room
- Development of an energy balance sheet
- Reckoning of energy saving measures
- Elaboration of an action plan for energy saving measures
- Drawing up an energy audit report, according to the provisions of the Brussels Institute for Management of the Environment (IBGE)
- Submission of the report to the portal of the Brussels Institute for Management of the Environment (IBGE)
