

Telindus office building

In order to house its extra staff, Telindus extended the main office in Heverlee.

About 20,000 m² of offices, education rooms, meeting rooms and a personnel restaurant were provided. In addition, an underground car park with 540 parking spaces was built.

The building meets the highest requirements for modern comfort and is equipped in a very flexible manner with the newest techniques in the fields of telematics, building management, etc. Ingenium was charged with the study of the technical equipment (HVAC, electrical circuitry, sanitary facilities, lifts, building management).
