

WZC Ter Linden, Veurne

The Veurne Social Services (OCMW) demolished the oldest section of the Ter Linden residential and nursing centre to replace it by a new building and to partly renovate it.

The residential and nursing centre Ter Linden, housing 159 inhabitants, lies on an ideal place near the city centre and in the middle of a green area. To keep providing a qualitative care, the oldest section of the building is partly demolished, renovated and extended with a new building. In here, 60 retirement home rooms will be installed.

The Veurne Social Services (OCMW) chose for sustainable energy by installing a sun boiler for the sanitary hot water and photovoltaic cells for the production of electricity. Ingenium's task comprises the study and monitoring of the execution of the technical equipment at the construction site.
